Seckendorff with 1200 Horse and 1000 Not far from Julbach, at the Diftance of Not far from Julbach, at the Plante of a League from Markel, they met with about 50 Enemy's Huffars, of whom they made 15 Prifonsiled feveral, and drove the rest to their Camp be-

M. Seckendorff drawing near to the last-mentioned Place, received Intelligence that Gount Minucci had ordered the Detachment commanded by Col. La Croix. and reinforced by 200 Grenadiers, to pass the Inn, and encamp at Himbach, where receiving Information that the Austrians had in the Village of Ering 600 Huffars and Groats, he resolved to dislodge them. Count Ferrari was charged with the Execution of this Pro-Fusieers, and being supported by Col. La Croix, not only obliged the Hussars and Croux to abandon their Post, but to set fire to their Camp, and retire precipitately towards the Bridge. There were several Prisoners taken, and not a sew killed and wounded in this

Landau, Dec. 17. We are affembling the Militia in this Neighbourhood, and expect they will be joined by the Militia from all the Provinces of the Kingdom. When they are compleat, they will march, but wh we know not; we guess, however, that it will be into Bavaria. Our Garison consists at present of 4000 Men. but Troops arrive daily, and Detachments are fent into Bavaria under colour of convoying the Horses necessary to remount the Cavalry.

HOME PORTS.

Falmouth, Dec. 16. Wind S. Arrived his Majesty's Ship the Greyhound, Capt. Carteret, from Lisbon; the Jan Hendrick, Orntfe Vandeyk, from Bourdeaux; the Don Oreyne Stam, Jin de Boo, from Castro for Rotter-dam; and the St. Paul, Dennis, from Bourdeaux for

Pool, Dec. 18. Wind S. S. W. Remains at Brownfey, the Juffro Anna Virginia, Bohee, of and for Dantzick

Cowes, Dec. 18. On the 15th came down from Spithead the Urfula Tender, Hilton, and failed the next Day to the Westward. Came in the Jufro Maria en Sara, Eitson, of and for Rotterdam from Bourdeaux. On the 17th came down from Spithead the Prifcilla Tender, Ford, and failed the fame Day to the Westward. Came in the Jange Jan Oephes, ——, of and for Amsterdam, and the Belia, Hock, of and for Rotterdam, both from Bourdeaux.

Dover, Dec. 19. Wind S. W. Came in the Golden Fortune, Hume Cefar, for Bremen; the Cornelius, Ro-Fortune, Hume Cefar, for Bremen; the Cornelius, Rotherburg, for Marfeilles; the John and Peter, Gorson, and the Hendrick, Alvery, all from Bourdeaux; and the Hope, Mitcherman, all for Rotterdam. Sailed the Success, Sheppard, the Mary and Elizabeth, Bradford, the William and John, Crowdson, and the Dove, Daresling, all for Dunkirk; and about seven or eight light Colliers

Deal, Dec. 19. Wind S. W. Came down and remains with the Industry Tender, the Swift, Watts, for St. Helena; the Duke of Lorrain, Newton, for Leghorn; and the Catherine, Crathorne, for Lisbon.

LONDON.

Letters from Gibraltar, dated the 24th of November, bring the melancholy News of a Storm happening there the 22d in the Evening, the Wind from S. W. to N. W. by which the Drake Sloop of War, station'd to that Garrison, the St. George, Capt. Wright, and the Betty, Capt. Cleland, with Provisions from Portsmouth, were forc'd on shoar and beaten to Pieces. Other British Ships suf-fer'd, and several French, Dutch, Portuguese, and Italian

Ships and Vessels, were wreckt or greatly damag'd.

The Mary Galley, of 40 Guns, from Mahone, and the
Revenge Man of War, Capt. Berkley, of 70 Guns, from
England, were arriv'd at Gibraltar.

Those Letters bring a Confirmation of two Algerine Cruizers, one of 40 and the other of 20 Guns, having been wreckt near Mahone, and but Nine Men out of about

They were eagerly expecting fome small Cruizers at

Gibraltar, not having one left.

The Collett, Vaughan, is arrived at Scilly, from Ja-

aica for London.

maica for London.

We hear her Royal Highness the Princess of Wa'es is much indisposed, at Carlton House, of a Cold.

A few Days ago the Watchman belonging to Mess. Bronsden and Wells at Deptiord was sound drown'd in their Wet Dock. He had been missing above a Week, and tho' great Search was made after him, he could not be found till they had pull'd up the Sluices and drain'd the Dock.

On Saturday last Thomas Bootle, Esq; Member of Par-liament for Midburst in Sussex, and Chancellor to his Royal Highness the Prince of Wales, gave a grand Enter-tainment at his Chambers in the Inner Temple, at which

were present the Earls of Winchelsea and Bath, the Lord Carteret, and several other Persons of Distinction. On Saturday Night last his Grace the Duke of Queens-berry arrived at his House in Burlington-gardens from Scotland. And

Yesterday his Grace went into Waiting as one of the Lords of the Bedchamber to his Royal Highness the

Lords of the Bedchamber to his Royal Figure Prince of Wales.

Yesterday Morning about One o' Clock the Rt. Hon. the Earl of Loudoun arrived at his House in Privy Garden Whitehall, from Flanders.

Last Night between Ten and Eleven o'Clock a Pawnbroker (whose Name and Place of Abode we choose not to mention) was robb'd of his Watch at the reputable House of Mr. Y—g in Hanging-sword-alley, Fleetastreet. The Watchmen were call'd and readily came to the Gentleman's Assistance, but as the Bird was slown

that peck'd the Morfel, 'tis imagin'd past Recovery.

About three Hours before this Affair, another Gentleman was sent home lighter than be came, by his Watch and a Guinea, from another House of equal Repute in

Between Eleven and Twelve o'Clock there was a violent Outcity of Murder from a third House in the above Alley, but the Cause we did not stay to learn.

This being St. Thomas's Day, a Wardmote will be held in each Ward, for the Election of Common-councilmen

in each Ward, for the Election of Common-councilmen for the enfuing Year.

We are credibly informed, that a certain Body of Men are determined to oblige the inquisitive and studious Part of Mankind to purchase every Book they read, nay before they read it, by depriving those who lend Books of the Benefit of advertising their Design in the Publick News Papers; And that Mr. Fancours, who has opened an Universal Circulating Library, next Door to the Royal-Society House, in Crane-Court, Fleet-street, has been actually deny'd this Privilege by Two of the Daily Papers, thro' the Instigation of those who seem to be in Pain, that his Subscribers should have the agreeable Entertainment, as well as Advantage, of looking into such a great Variety of Subjects, for so small an Expence. The Particulars may be seen at large in the printed Proposals, which any Gentleman or Lady may have Gratis at the Place above-mentioned: The Substance of which is, 'That the Curious who subscribe, may be surnished: 'at their own Houses, with Books and Pamphlets, of at their own Houses, with Books and Pamphlets, of their own chusing, in all Professions, and upon every Subject of Amusement, with the Trouble only of a Penny-Post Letter, directed to the Librarian.

Just published,

THE Elements of ALGEBRA, in a New and Eafy Method, with their Use and Applica-tion, in the Solution of a great Variety of Arithmetical and Geometrical Questions, by General and Universal Rules. To which is prefix'd, An Introduction containing a suc-cinct History of this Science.

By Mr. NATHANIEL HAMMOND, of the Bank.

Extract from the Account of this Book in the Works of the Learned.

'The World has long complained of the Want of a proper Introduction to Algebra. Some are so very concile, as if they were contrived not to teach but introduce a Teacher; others again are larger, but wrote with so little Condescention to the Understandings of such as are altogether unaction to the Understandings of such as are altogether unaction to the Understandings of such as are altogether unaction to the Understandings of such as are altogether unactions when are most inclined to make use of very little Use to those who are most inclined to make use of them. Whence it comes to pas, that sew find it pradicable to make any Progress in Algebra without a Master, the certainty the Science in itself is far from surpassing a clear Head, and a tole-rable Understanding.

rable Understanding.

The Design of this Treatise, which is of a reasonable Bulk, and which contains nothing which is not folid, and to the Purpose, is to affilt such as are engaged in teaching Algebra with a regular Method, and a large Stock of Examples; so that their Scholars may find Employment in their Absences, and to enable such as live in Country-Places, and must consequently want all other Tutors, except Books, to acquire such a Skill in this Science, as may enable them to spend a Portion of their Time agreeably in the Cultivation of their better Parts, and in rendering a natural Method of enquiring after Truth habitual.

The Treatise begins with a copious Explication of the Fundamental Principles of the Art, and of the Signs and Method of Notation used therein. The Author then proceeds to the several Rules, explaining them carefully and severals to the several Rules, explaining them carefully and

Ing alter Truth habitual.

The Treatife begins with a copious Explication of the Fundamental Principles of the Art, and of the Signs and Method of Notation used therein. The Author then proceeds to the several Rules, explaining them carefully and copiously in all their various Cases; so that with a moderate Attention it is simply impossible for a Person, who desires to be Master of Algebra, to miss of his End.

We never find this Writer advancing any thing out of its proper Place, or burthening the Mind of his Scholar with Rules, before they become necessary: He professes to have imitated the judicious Euclid in this Respect; and he has done it with equal Art and Felicity. By this means he has delivered the young Student in Algebra from that which is usually the most satisfied and he has be delivered the young Student in Algebra from that which is usually taught. By the same Means he leads his Reader directly to Equations; and, by shewing him the Profit he will reap from this Science, encourages him to overcome all its Difficulties. But having thus laid a strong and rational Foundation, he moves more slowly through the rest of his Work, that whoever follows him, may be obliged to become Master of ever Branch of the Art, so as to be a compleat Algebraiss, before he quits his Book, and not a Smatterer.

Quadratic Equations, and the Art of managing Convergeing Series, the admirable Invention of the incomparable Newton, are here so clearly explained, and their several Cases so plainly set down, and so thoroughly explicated, that it may be truly said, there are no where else such Instructions to be met with. At the Close of the Book, we find abundance of Observations, necessary for enlightening such Minds as are willing to proceed still farther in analytic Discoveries, so that considering the Compass of this Work, and that too is very moderate, it is as complete as possibly can be expected: And he who is thoroughly versed in it, will find no great Dissiruties, when he proceeds to sublimer Studies. The Language is pl
